

Congratulations!

You are the proud new owner of a gorgeously awesome car decal. :-)

Here's how to stick it on (done by Adam himself at 12 below in January! Yikes! He's not the sharpest tack...still recovering from frostbite). They do go on easier when it's warmer....

Enjoy!
Adam and Austin

1. Peel off the backing
(wash the window first!)

2. Measure with your eagle eye

3. Lay her down

4. Smooth down with a credit card to make sure it sticks

5. Carefully peel off the masking...

....until it's all off.

VOILA!!
